How to deal with these data in GrimoireLab?

- Heuristics
- SortingHat CLI
- identities.json + organizations.json
- identities.yml
- ...

/sortinghat

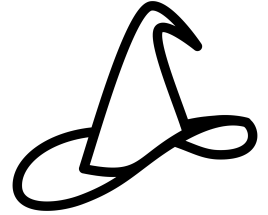

---

How to deal with these data in GrimoireLab?

/why hatstall?

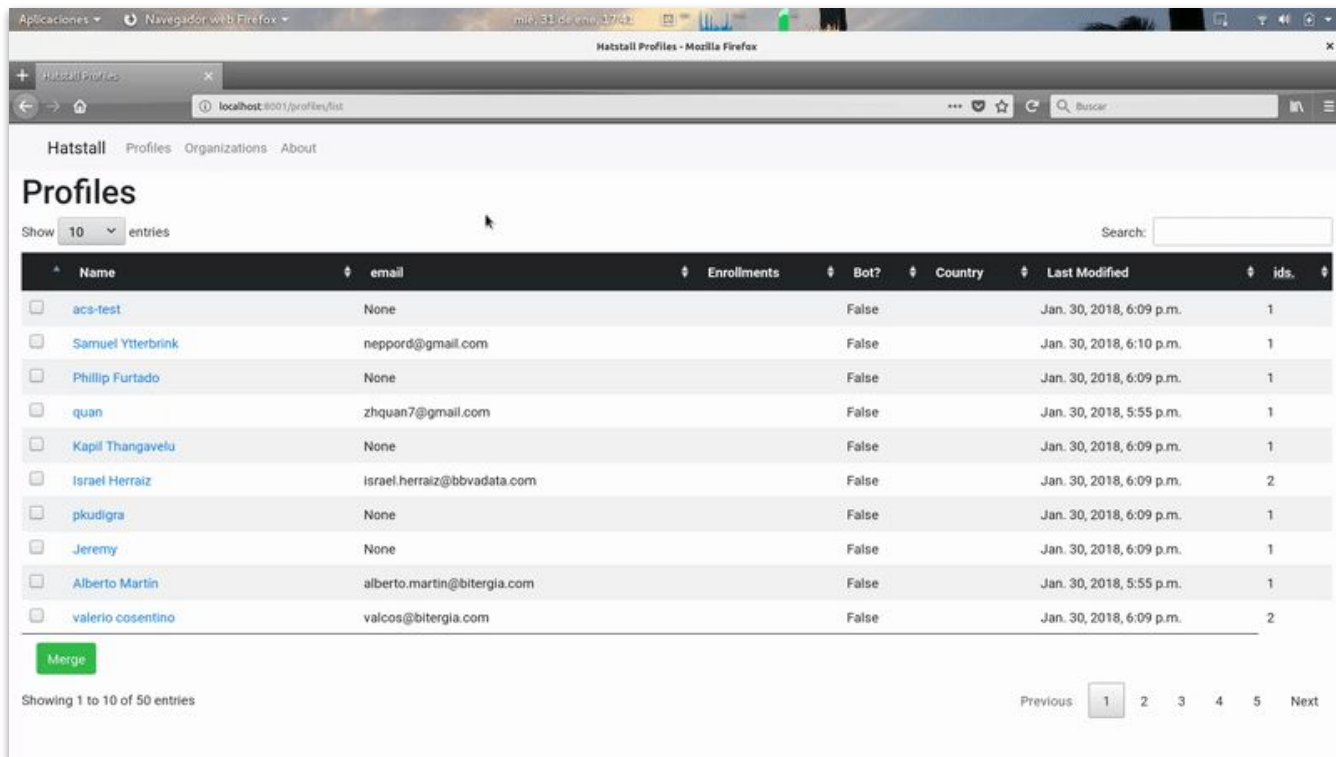

---

A Hatstall was an archaic term for a student of Hogwarts School of Witchcraft and Wizardry **whose sorting took more than five minutes because the Sorting Hat found them to have a personality equally suited to different Hogwarts Houses.** The Sorting Hat sometimes took the student's personal preference into consideration in order to break such a tie.

/how it works?
