

Guidelines for creating sustainable open source communities in the public sector

CHAOSScon Lightning Talk

31 January 2020
Open Source Observatory (OSOR)

"OSOR aims to become a trustworthy observatory that provides FOSS expertise and information as well as serves as middle-ground to connect European Public Administrations with other relevant stakeholders. To reach this objective, OSOR will support a dynamic community and further promote the use of Free and Open Source software."

Guidelines for creating Sustainable Open Source Communities within the Public Sector

Key factors

Identify the **key success factors** contributing to sustainability of public sector OSS communities.

Case studies

Develop **case studies** of successful and failed OSS initiatives in the public sector.

Guidelines

Create **community driven guidelines** for fostering open source communities in the public sector.

"A healthy or successful community can be defined as a viable, organisational-friendly community that consistently produces high-quality, innovative products and services."

Maha Shaikh

Our findings so far

The literature review revealed that **five key factors** contribute to the sustainability of public sector OSS communities.

How you can contribute

Participate in **our questionnaire** on the sustainability of open source communities, published on OSOR and disseminate the questionnaire in **your network** to ensure that our guidelines are truly community driven.

Get in touch with us and let us know if you have any feedback or ideas that can assist us further in our project. Join our **workshop on OSS community at FOSDEM20**.

Join the [OSOR community](#) and participate in the upcoming webinars and workshops!

Questions?

Thank you!

THANK YOU!
